

Time Flies Clock

This fabulous clock takes a few steps but is well worth the effort. We have shot the instructions on a raw clock, but its recommended you decorate your clock before assembly.

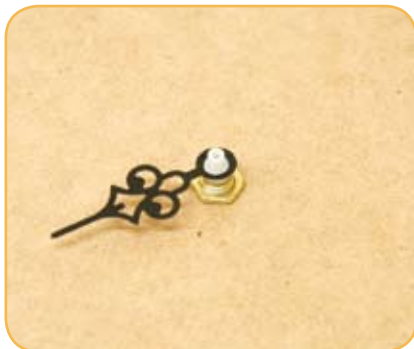

1. Place the rubber washer and gold washer onto the clock mechanism.

2. Take the clock mechanism and thread it through the hole on the clock base.

3. Take the remaining washer and thread it onto the clock mechanism to secure it to the clock base.

4. Take the hour hand and click onto the clock mechanism.

5. Take the minute hand and click onto the clock mechanism.

6. Take the second hand and click onto the clock mechanism.

7. Take the two stand pieces and slot and glue together.

8. The last piece to stick on is the frame, once it has been decorated. You can now place your clock base onto your stand.
