Paper Book Mark

This super quick and easy project will take care of marking the pages of your book or magazine and unlike other bookmarks, this paper one grabs onto your pages and will not fall out when you open your book.

1: Cut a piece of paper 150 mm x150 mm.

2: With the right side facing down, fold your piece of paper in half diagonally into a triangle.

3: Fold the top layer down to the base of the triangle.

4: Bring the side points up to the top point so that it makes a diamond.

5: Tuck the ends of the points you just folded down into the pocket that was made from the fold in step 3

6: Place a brad or button on top for extra effect!
