

Star Book

Whether you choose to hang it, leave it open on a mantel or keep it tied up as a book this versatile piece looks great in any home!

Star albums are a unique and different mini album that open up into a star shape that you can then display on a coffee table or mantle. It is also a great way to use up your ever growing stash of cardstock.

You will need to cut the following before starting;

Two pieces of Chipboard for the cover measuring 13.5cm x 11cm (5¼" x 4¼"), and two pieces of Printed Paper measuring 17cm x 14.5cm (6¾" x 5¾").

We have used four different colors of cardstock - select a variety of coordinating colours and cut as specified below;

Color A - Six rectangles 24cm x 10cm (9½" x 4")

Color B - Six rectangles 21.5cm x 10cm (8½" x 4")

Color C - Six rectangles 19 cm x 10cm (7½" x 4")

Color D - Six rectangles 16.5cm x 10cm (6½" x 4")

Cut a piece of ribbon approximately 80cm long.

Fold all your cardstock in half then adhere double sided tape to the two side edges on the back of all pages.

Take your front piece (pale green) whilst folded - cut out a rectangle along the fold 4.5cm x 6cm (1¾" x 2½"). This will create a frame for a photograph underneath. Embellish around the frame with rub-ons and other decorations now as it is too difficult to do once the album has been put together.

Before we start to stick the album together separate the cardstock into 6 sets, so that each set has one piece of each size and color.

Piece together one set at a time with the largest on the bottom. Carefully adhere the two ends of the bottom (red) and second layers (pink) together. If you wish to place in a photo, now is the time to adhere it to the third layer (darker green) piece. Before adhering, mark the photo where it will fold and lightly score it. This helps it fit into the fold easier. Once photo is attached adhere this piece (darker green) on top of the others. Take the embellished frame piece (pale green) and adhere to the other three.

You should now have one section of the star. Repeat the above for the other 5 sets. Once all 6 sets have been assembled, you are now ready to join them together with a strong double sided tape. (See Photo 2). Remember NOT to join the front and back pieces yet (this is what the cover pieces will be attached to).

Cover the raw chipboard with pieces of printed paper and embellish as desired.

Attach one length of ribbon to the back of the front cover, leaving approximately 30cm overhanging, then attach the front panel piece (of your paper shape created above) to the cover again using double sided tape - place a little extra to ensure the ribbon stays in place. Leave enough ribbon to go around the back pages of your album (approximately two fingers width) and then repeat the same for the back cover. Image 4 is an overhead shot of where the ribbon (orange line) should go.
