KC048 Soft Moss

Elegance Paper Collection

Lightly sand the edges of all pieces of your box and the ribbon reels removing all rough edges.

Paint the front and back of each of the ribbon reels as well as the edges, insides and both sides of the box bottom.

From the Victoria paper, cut four strips 5cm wide. Adhere these strips to the bottom edge of the outside panels of the box. You do not need to cover the tabs as this will interfere with the construction of the box later. Trim any excess paper. Where you have covered the hinge holes, it is not necessary to remove the paper from over the top as it gives a cleaner finish and hides the lids hinging.

Using the Elizabeth paper, cut four 5.5cm strips of paper and stick on the top edge of the outside panels of the box.

Cover both sides of the lid using Elizabeth. From a left over piece of the Victoria paper cut a 10cm x 19cm rectangle. Along one of the long sides, use the Scallop blade in the KaiserCutter to trim a decorative edge.

Cover the small chipboard letters to spell the word “sewing” using the Elizabeth paper (reverse side). Cut away the excess paper using a sharp craft knife and lightly sand the letters to remove any rough edges.

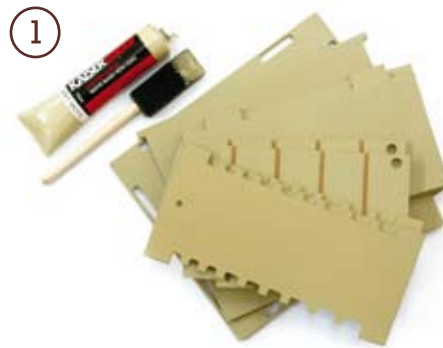

Repeat the previous step for the word ‘box’, using the Catherine paper.

Using Kaiser Glue, run a small amount of glue along the bottom and sides of the box’s front. Do the same along the bottom of each of the sides. Slot the pieces into the base to create the box. Note that the front piece is slightly smaller. Attach the lid in place, slotting each of the tabs into a hole, and use elastic bands to hold your box together whilst the glue dries.

Ink or paint the wooden flourishes before attaching to box and embellish further with pearls.

Hint

Use the Ribbon Reels to wrap your favourite ribbons around and slide into the slots provided. The box can then be used as a storage solution for your ribbons.

Tip

We have used a small amount of paper lace to trim the front side of the box. You could use ribbon or lace instead if required.
