Hanging Frame

Capture your most precious memories for everyone to see in this elegant Hanging Frame.

Lightly sand all pieces to remove any rough edges. Then paint all edges including the inside of the windows, using red for the medium frame and pistachio for the small and large ones. When this is dry you may require a second coat.

Use the reverse of the Hampton paper to cover the front of the smallest and largest frames. Flip these over and trim over-hanging paper from the edges and remove the paper from around the frame using a sharp craft knife. Using the reverse of the Mayfair paper cover the front of the medium frame and follow directions for the small and large to trim excess papers.

Lightly sand the edges of the paper to remove and rough edges.

Gently apply desired quote rubons to the largest frame as shown.

Use the Jubilee paper to hand cut 5 flowers and from the remainder, cut five flower bases minus the stalks and five of the tear shaped center pieces.

By using foam mounting tape you can give these flowers dimension by attaching the teardrop to the flower base and then attach further foam tape to the underside of the base onto the full flower. You should now have three layers.

Arrange three of these dimensional flowers around one side of the largest frame, overlapping them from stem to tip and then one to each of the small and medium with the remaining two flowers as shown in the illustration.

Add tiny pearls to the dots on the base of the flowers and one large pearl to each of the tear shaped centers.

Tip

The frame can be easily adapted for many special occasions, such as displaying baby or wedding photos.
