

Days Til Christmas

This tree only needs a few simple steps and your imagination to look fantastic. Once again it is best to decorate all your tree components before assembling.

1. Using the tip of a scalpel, make two holes in the centre of your tree where you want your hooks to go.

2. Take a hook and place it in the hole you made, screwing it in until the base of the hook is level with the mdf. Do the same with the remaining hook.

3. Slot and glue the base piece to the tree. Break apart your number tags and hang from the hooks.
