Kaiser colour - Sage

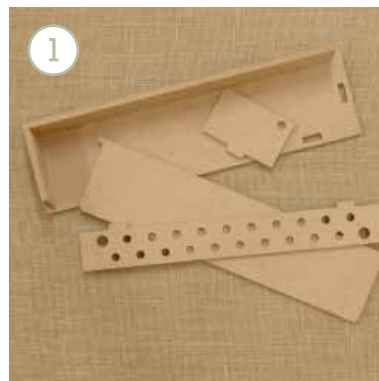

Kaiser scrapbook paper  
Selection pack: Spring

Think about what colour ribbons you are going to store in this ribbon box and if possible choose the color of your paint and paper accordingly.

Gently sand pieces to remove any rough edges.

You can assemble the box now and paint it later, but if you wish to distress any of the edges for an aged effect it is easier to paint each piece your desired colour now and then distress each edge individually before assembling. The same applies for the inside of your box, you can turn your painted pieces over and do each piece now or wait until it is assembled.

Perfect to store all your miscellaneous ribbons in

### Tip

If you have any large rubber bands they are great to hold together your storage box whilst glue is drying.

KAISERscrapbook

To assemble, glue together each piece, leaving one of the sides until last otherwise you won't be able to insert the lid notch into the correct position.

When the glue is dry cut a 5.5cm strip of 12x12 patterned paper and stick to lid of box.

Again dig into your stash of embellishments and decorate as desired.

Roll up neatly some of your ribbons and place ends through appropriate holes so you can see them.
