SB823 Lime

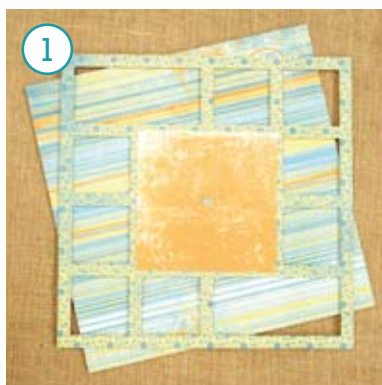

SB725 Curls

SB812 Orange

SB509 Life

1 Cover the frame piece of the clock with *Ocean Tide* paper, carefully cutting out the frame holes. Sand all edges gently to distress.

Cut a square 13.5cm x 13.5cm (5¼" x 5¼") from *Summer Breeze* (reverse side) and adhere to the centre of the clock face on the frame piece. Cut out the centre hole.

Cover the back piece with *Sea Spray* (reverse side). Trim edges and cut out the centre hole, then sand.

Position the frame piece over the back piece and lightly draw inside the frames with pencil. Cut 2 squares from the *Summer Breeze* 6.5cm x 6.5cm (2½" x 2½"). Cut 1 square 6.5cm x 6.5cm (2½" x 2½") and 1 rectangle 13cm x 6.5cm (5" x 2½") of *Sand Dune*. Using the pencil lines as guides, adhere these pieces in the positions shown in Photo 3.

Lightly ink the tops of the numbers only with black ink. Leave to dry.

Add rubons to the back piece using your pencil lines and paper squares as guides.

Mount all the photos onto a range of sheets from *Esperance*, lightly ink the edges and adhere in place, again using the pencil lines as guides.

Using craft glue adhere the frame piece to the back piece of the clock. Doodle a border line along the edge of the front piece and the *Summer Breeze* (reverse side) square.

Adhere the wooden numbers at the 12, 3, 6 and 9 hour points, sitting them on the edge of your *Summer Breeze* (reverse side) square. Position rhinestones at hourly intervals as shown in the main photo.

Embellish with wooden flourishes, flowers, more rhinestones and any other rubons you desire. Add glitter to the wooden flourishes to make them sparkle.

To finish your clock, add the clock mechanism. If you wish, add gloss varnish to the numbers.

To download clock mechanism instructions go to www.kaisercraft.net, select your region, then click on Beyond the Page at the top, and then Instructions on the left menu. Download the instructions from here.

Please note: Stand is not included with the Frame Clock.

Hint

Always position photos and rubons on your project without adhering first. When happy with the placement proceed to adhere photos and apply rubons.
