P214 Periwinkle

SB539 Fancy Border

SB543 Flourish Corners

SB522 Inspiration

SB526 Basic Lowercase

P215 Macha

Hint

Sepia toned photographs work beautifully with the Cocco Paper Collection.

Tip

If you would like to add numbers to your clockface, you could use Denim Pearls to define the hour points. Alternatively use the numbers from our SBS46 Clocks rubon.

Lightly sand each piece, then paint all edges.

Cover the top half of the clock with 15cm (6") strip of *Cinamon Sugar*, ensuring the hole for mechanism is in the top right corner. Cover the bottom half with a 14cm (5½") strip of *Mocha*.

Cut a 2.5cm (1") strip of *Mocha* (reverse side) and adhere across the middle, overlapping both papers. Position and adhere a border rubon along this.

Cover the front of the photo frame and both sides of the stand in *Mocha* (reverse side). Cut two corner rubons from the Flourish sheet, then position and adhere these to the top left and bottom right corners of the photo frame.

In pen draw a border on the square backing panel, the frame, and the frame windows (break the line for the corner rubons). Trace around the frame onto the main backing square to create an outlined rectangle (see Photo 3).

Cut four words from the Inspiration rubon and position these down the right hand side of the clock's lower half. Use the Basic Lowercase alphabet to write the phrase 'you show them how'. Dot large pearls at the end of each word and in a line underneath the phrase.

Affix photos to the frame, then adhere the frame to the clock on an angle overlapping the outlined rectangle. Place Ice Blue rhinestones along the outline of this rectangle in groups of three (see main photo), breaking where the frame overlaps. Decorate the frame and the *Mocha* strip with black rhinestones.

Place the Circle Border rhinestone around the clock mechanism hole. Attach clock mechanism and hands. Glue the stand pieces together and once dry rest the clock on this.
